1. We first must hold our city officials accountable for continuously placing profit over people. We need more housing, Not hotels! Secondly, We as a people MUST get back to seeing the humanity in each other. Equality + Equity is how we all win.

2. Again, seeing each other as human beings first will steer us in the right direction. We also must introduce practices of healing, stress relief, and conflict resolution. People are hurting and angry w/ no other outlets to express themselves other than lashing out. Creating spaces where we can hear each other & gain understanding goes a long way!
